

Martha's web sites are hosted by Dot5Hosting using 100% Wind Energy Offsets

Green Site Certified by **Dot5Hosting**

Dot5Hosting Green Certificate

Dot5Hosting, an EPA Green Power Partner, certifies that is powered by 100% wind energy. That means the servers, data centers and offices supporting are powered by renewable energy.

How Has Gone Green

Dot5Hosting has purchased Renewable Energy Certificates (RECs) to offset our energy use, in an effort to reduce our impact on the environment. That means by hosting with Dot5Hosting, is powered by 100% wind energy.

Measuring the Environmental Impact

By hosting with Dot5Hosting, is helping our company prevent the release of 2,660 metric tons of carbon dioxide from entering the atmosphere each year. As a result, our company's energy efficiency is equivalent to planting approximately 2,390 acres of trees, not driving 6.1 million miles, or removing 510 cars from the road.
